

Tube Fittings & Adapters

Whatever your system connection needs, Parker's tube fittings and adapters can help get it together. Parker manufactures steel, brass and stainless steel hydraulic tube fittings and adapters. In addition, Parker offers a wide variety of equipment from tube benders to Parflange® machines, which flare and flange using our patented technology. Parker also has a dedicated facility that can quote and ship specials at a moment's notice.

Brass Fittings & Valves

Parker has the products that set the world standard for fittings for low- and medium-pressure applications. With an extensive catalog and the ability to create custom components, we can provide the configuration you need in any quantity – from a single piece to a large production run.

Quick Couplings & Swivels

Parker offers one of the most complete lines of quick-disconnect couplings, hose swivels and diagnostic equipment. Quick couplings are available in steel, brass, stainless steel and thermoplastic materials for nearly every application. A wide variety of sealing and port options make Parker products a very versatile choice.

leak-free systems

Parker is the world leader in developing leak-free fluid connector components and systems. Parker serves diverse markets and applications for both original equipment manufacturers and maintenance, repair and overhaul requirements.

Your complete source for quality tube fittings, hose & hose fittings, brass fittings & valves, quick-disconnect couplings, and assembly tools, locally-available from a worldwide network of authorized distributors.

Fittings & Couplings:

Available in inch and metric sizes covering SAE, BSP, DIN, GAZ, JIS and ISO thread configurations, manufactured from steel, stainless steel, brass, aluminum, nylon and thermoplastic.

Hose, Tubing and Bundles:

Available in a wide variety of sizes and materials including rubber, wire-reinforced, thermoplastic, hybrid and custom compounds.

Worldwide Availability:

Parker operates Fluid Connectors manufacturing locations and sales offices throughout North America, South America, Europe and Asia-Pacific.

PARKER FLUID CONNECTORS

Products and Services

Bulletin 3400
April 2007

your single source

Parker has the most complete line of fluid connector products and services for hydraulics, pneumatics and fluid systems. Our global distribution network and strategically located service centers assure you can get the products you need when and where you need them.

Rubber Hose & Fittings

Parker has the largest variety of rubber hose with more fitting sizes and configurations than any other manufacturer. Designed to meet or exceed international standards, Parker's reinforced rubber hose is engineered for a wide variety of fluid applications with working pressures up to 8,000 psi. With the Parkrimp crimping system, metric fittings, and all required accessories, Parker's product line is complete and is exactly what you need.

Industrial Hose

Parker provides proven hose systems designed to efficiently and cost-effectively meet the specific demands of the industrial hose marketplace. Choosing the right hose system ensures that it will deliver maximum assembly life, safety on the job and optimum productivity.

Thermoplastic, Hybrid and Stainless Hose & Tubing

Parker offers a complete selection of specialty hose and tubing products made from a variety of materials for diverse applications. Materials range from thermoplastics – including fluoropolymers – to hybrid constructions to stainless steel. Applications are as diverse as medical, beverage delivery, truck air brakes, oil and gas, to heavy industrial uses, from vacuum to 100,000 psi and from cryogenic temperatures to 450°F. Parker also offers a wide range of custom products with enhanced features and characteristics that offer superior performance over competitive products.

ParkerStores

ParkerStores are the place to find more than 3,000 parts in-stock in all major thread configurations, including metrics. Whether you need a replacement hose assembly, fittings for an upgrade or advice on how to complete a connection, count on the wide selection and product expertise you'll find at your local ParkerStore.

On-Site Hose Replacement

When downtime threatens your productivity, the HOSE DOCTOR® is on-call and ready to be on-site when you need it most. The HOSE DOCTOR vehicle is fully stocked with Parker parts and equipment to service your systems for fluid connectors replacement, preventive maintenance and emergency breakdown requirements.

Inventory Management

Working with you, Parker can custom-design an inventory management program that can help you reduce inventory and improve efficiency. Customized to your specific requirements, including max/min bin stocking levels and delivery times, this program can deliver real savings to your bottom line.

Fluid Connector Custom Kits

The ultimate in efficiency, these pre-assembled kits offer hose, fittings and related products in a single package—with one part number and one invoice. Fluid Connector Custom Kits help streamline ordering, reduce product-handling costs and improve production control. These packages are customized for your specific needs.

Specials

Each of the six Parker Fluid Connectors divisions has dedicated facilities to manufacture "non-standard" products. We have the ability to manufacture various sizes in any of your material needs. We can work from your drawings to make products to spec, or Parker can engineer a custom solution. In emergency/downtime situations, many products can be made within a day.

Technical Services Application Engineering

From new product development to solutions that increase manufacturing productivity and efficiency, Parker Tech Services application engineering can help improve your competitive edge. Our field engineering team offers a full range of value-added services including on-site engineering support, leak-free fluid connector system design and prototype development. What's more, our Genuine Parker Parts program offers a three-year guarantee against leakage.

parker solutions

You've come to the right place for problem-solving programs designed to help you reduce costs, improve safety, streamline manufacturing and enhance product quality.
